The HUAWEI SUN 2000-17KTL-M2 HC inverter is a three-phase photovoltaic chain inverter, specially designed to convert direct current energy generated by photovoltaic panel modules and deliver it to the electrical grid. Its application includes residential rooftop installations connected to the grid as well as small ground-mounted photovoltaic installations, also connected to the grid. In a typical grid-connected installation consisting of photovoltaic chains, inverters connected to the grid, alternating current switches, and energy distribution modules, the HUAWEI SUN2000 inverter plays a key role in efficiently converting and delivering electrical energy. The high-current version is characterized by a permissible higher input current on the DC side.
