

SMA Sunny Tripower 5.0 Smart Energy STP5.0-3SE

Product code: F.SMA.H.3F.wifi.00050.STP8.0-3-SE

SMA Sunny Tripower 5.0 Smart Energy STP5.0-3SE is a modern hybrid inverter that combines energy efficiency with smart energy management. Ideal for photovoltaic systems, it allows simultaneous power supply to the home and storage of excess energy in batteries.

Product description

SMA Sunny Tripower 5.0 Smart Energy STP5.0-3SE is an innovative three-phase hybrid inverter designed for modern photovoltaic systems. With a power output of 5 kW, it is ideal for households and small businesses.

Thanks to advanced hybrid technology, the device enables simultaneous power supply to buildings and storage of excess energy in batteries, significantly increasing energy efficiency and savings.

With SMA Smart Connected technology, the inverter monitors the system, providing alerts about failures and service needs, minimizing downtime risks. The inverter also supports integration with energy storage systems, enabling optimal management and increased self-consumption. SMA Tripower 5.0 is an advanced solution that supports sustainable development and energy independence in your home.
