The HUAWEI SUN 2000-17KTL-M5 HC inverter is a three-phase photovoltaic chain inverter specifically designed to convert the direct current energy generated by photovoltaic panel modules into electricity and deliver it to the electrical grid. Its application includes residential rooftop installations connected to the grid and small ground-mounted photovoltaic installations, also connected to the grid. In a typical grid-connected installation consisting of photovoltaic chains, grid-connected inverters, alternating current switches, and energy distribution modules, the HUAWEI SUN2000 inverter plays a key role in efficiently converting and delivering electrical energy. The high-current version is characterized by a permissible higher input current on the DC side.
