

HUAWEI SUN2000 20KTL-M5 HC

Product code: F.Huawei.3F.withoutwifi.00200.M5.HC

| | |
|-----------------------|-----------------|
| Manufacturer | HUAWEI |
| Inverter type | On-grid |
| Inverter phases | 3 |
| Max. AC power | 20000 |
| Max. DC power | 30000 |
| Output power | 20000 |
| Circuit breaker value | 40 |
| MPPT | 2 |
| Amperage | 27 |
| WIFI | Nie |
| Ethernet | No |
| Compatible optimizers | Huawei |
| Warranty | 10 |
| CN code number | 85044086 |
| Quantity per pallet | 2 |
| Country of origin | China |
| Weight | 74 |
| Width | 47 |
| Height | 52 |
| Depth | 26 |

The HUAWEI SUN 2000-20KTL-M5 HC inverter is a three-phase photovoltaic string inverter, specially designed to convert direct current energy generated by strings of photovoltaic panel modules and deliver it to the electrical grid. Its application includes rooftop residential installations connected to the grid and small ground-mounted photovoltaic installations, also grid-connected. In a typical grid-connected installation consisting of photovoltaic string arrays, grid-connected inverters, alternating current switches, and energy distribution modules, the HUAWEI SUN2000 inverter plays a key role in efficiently converting and delivering electrical energy. The high-current version is characterized by a permissible higher input current on the DC side.

Product description

The HUAWEI SUN 2000-20KTL-M5 HC inverter is a three-phase photovoltaic string inverter, specially designed to convert direct current energy generated by strings of photovoltaic panel modules and deliver it to the electrical grid.

Its application includes rooftop residential installations connected to the grid and small ground-mounted photovoltaic installations, also grid-connected. In a typical grid-connected installation consisting of photovoltaic string arrays, grid-connected inverters, alternating current switches, and energy distribution modules, the HUAWEI SUN2000 inverter plays a key role in efficiently converting and delivering electrical energy.

The high-current version is characterized by a permissible higher input current on the DC side.

Advantages of the HUAWEI SUN 2000-20KTL-M5 HC inverter:

Protection against electrical arcs supported by AI - Up to 30% higher energy yield thanks to optimizers

"Plug & Play" battery interface

WLAN, Fast Ethernet, 4G communication support

Technical data of the HUAWEI SUN 2000-20KTL-M5 HC inverter:

Number of inverter phases: 3

Maximum efficiency: 98.4%

Recommended maximum PV power: 30,000 Wp

Maximum input voltage: 1100 V

MPPT voltage range at full load: 480V~800V

Starting voltage: 200 V

PV input operating voltage range: 200 V - 1000 V

Nominal input voltage: 600 V

Maximum working current for MPPT: 30 A (two chains)/20 A (one chain)

Max. short-circuit current: 40 A

Number of MPPTs: 2

Number of inputs: 4

Nominal AC output power: 20,000 W

Maximum apparent power: 22,000 VA

Nominal output voltage: 220 Vac / 380 Vac, 230 Vac / 400 Vac, 239.6 Vac / 415Vac, 3W + N + PE

Maximum output current: 33.6A/380Vac/ 31.9A/400Vac/ 30.8A/415Vac

Weight (with mounting bracket): 21 kg

Dimensions (with mounting bracket): 546 x 460 x 228 mm

Protection class: IP65

The HUAWEI SUN 2000-20KTL-M5 HC inverter is an advanced solution that not only offers features facilitating operation and monitoring but also ensures quiet operation and a long-term 10-year warranty, making it a solid choice for photovoltaic installations.
