The HUAWEI SUN2000-5KTL-M1 HC inverter is a three-phase photovoltaic chain inverter, specifically designed to convert direct current energy generated by photovoltaic panel modules into alternating current and deliver it to the electrical grid. Its application includes rooftop residential installations connected to the grid and small ground-mounted photovoltaic installations, also grid-connected. In a typical grid-connected installation consisting of photovoltaic chains, grid-connected inverters, AC switches, and energy distribution modules, the HUAWEI SUN2000 inverter plays a crucial role in efficiently converting and delivering electrical energy. The high-current version is characterized by an allowable higher input current on the DC side.
