The inverter HUAWEI SUN 2000-10KTL-M1 HC is a three-phase photovoltaic chain inverter, specially designed to convert direct current energy generated by photovoltaic panel module chains and deliver it to the electrical grid. Its application includes roof-mounted residential installations connected to the grid and small ground-mounted photovoltaic installations, also connected to the grid. In a typical grid-connected installation consisting of photovoltaic chains, grid-connected inverters, alternating current switches, and energy distribution modules, the HUAWEI SUN2000 inverter plays a key role in efficiently converting and delivering electrical energy. The high-current version is characterized by an allowable higher input current on the DC side.
