

FoxESS - FOX_POCKET_LAN_MODULE

Product code: AF.antenka.foxess.01

The Fox SMART LAN SMART L 3.0 module is an intelligent LAN communication module that enables communication between the FoxESS inverter and the FoxESS Cloud server. It is designed for monitoring and supervision of the system in areas where stable WiFi or GPRS connections are lacking. It boasts an elegant and neat design, ensuring continuous 24/7 monitoring. With this device, you can monitor system operation, adjust settings, collect and review historical data on energy production, and receive diagnostic alerts regarding devices.
