Goodwe LAN Kit for XS, SMT (USB, GA10081-51-00P)

Product code: AF.antenka.goodwe.01

Goodwe LAN Kit for XS, SMT (USB, GA10081-51-00P) The GoodWe LAN communicator enables connection with the inverter via the 5-pin/USB interface. It is designed to transmit data from the inverter to the GoodWe Cloud server. Furthermore, it is possible to connect the module to the internet using the LAN port, ensuring fast and reliable data transmission through Ethernet cable. Additionally, the module supports data encryption to enhance the security of transmitted information. With the interruption point handling feature, the module automatically saves data in case of connection loss and resumes transmission upon reconnection, thereby eliminating the risk of data loss. Moreover, the LAN communicator facilitates remote updates, allowing firmware updates for the inverter without the need for physical presence on-site.
