

## GoodWe Smart Meter GM1000 (single phase)

Product code: AF.licznik.goodwe.02

The GoodWe GM1000 single-phase meter, characterized by its intelligent design and high-quality construction, features compact dimensions and easy operation and installation. It is used for precise measurement of voltage, current, power, and consumed energy, as well as for integration with inverters, including SEMS energy management systems.

### Product description

The GoodWe GM1000 single-phase meter, characterized by its intelligent design and high-quality construction, features compact dimensions and easy operation and installation. It is used for precise measurement of voltage, current, power, and consumed energy, as well as for integration with inverters, including SEMS energy management systems. Advantages of the GM1000 single-phase meter: Modular design Accurate data collection Easy installation Convenient operation Technical specifications of the GoodWe GM1000 single-phase meter: Nominal voltage - between line and N (Vac): 110/230 Voltage range: 0.88Un-1.1Un Nominal frequency of the AC grid (Hz): 50 / 60 RS485 communication Communication distance (m): 1000 User interface: 3 LED diodes, Reset button Voltage / current: Class 1 Active energy: Class 1 Reactive energy: Class 2 Power consumption (W): <3 Mounting: DIN rail Protection degree: IP20 Operating temperature range (°C): -25 ~ +60 Storage temperature range (°C): -30 ~ +70 Relative humidity (without condensation): 0 ~ 95% Max. operating height (m): 2000 Dimensions (width × height × depth mm): 36 × 85

× 66.5 Housing: 2 modules Weight (g): 250
