

Double-threaded screw M10x200mm (set)

Product code: K.40x40.11

The double-threaded screw with dimensions M10x200 along with the flanged nut M10 constitutes a reliable mounting set, perfectly suited for photovoltaic installations. It ensures not only durability and stability but also ease of installation, making it an ideal solution for securing solar panels on profiles.

Product description

The double-threaded screw with dimensions M10x200 along with the flanged nut M10 constitutes a reliable mounting set, perfectly suited for photovoltaic installations. It ensures not only durability and stability but also ease of installation, making it an ideal solution for securing solar panels on profiles. The M10x200 screw with double-threaded construction guarantees reliable fastening, with its 200mm length providing stability by passing through material layers. Additionally, the flanged nut M10 enhances installation safety. This set offers robust mounting for photovoltaic panels, weather resistance, and meets the expectations of even the most demanding installers. Dimensions: Length 200mm, Diameter 10mm Material: Stainless Steel A2
