Product description

The adjustable J-type bracket, made of Magnelis material, serves as an essential component for mounting structures on roofs covered with asphalt shingles or roofing felt. With its design and adjustability, it ensures stable and durable mounting tailored to the specifics of this type of roofing. This bracket allows for flexible adaptation to various roof conditions and installation configurations, enabling safe and sturdy structure installation. Adjustable J-type products are intended for professional use, ensuring not only ease of installation but also long-lasting and reliable functionality. Product specifications: Length: 230 mm Thickness: 4 mm Width: 30 mm Material: Stainless steel grade 1.4301 according to PN-EN 10088-1:2014 standard Application: For mounting structures on roofs covered with asphalt shingles or roofing felt.
