Product description

Sheet metal screw 6x25 stainless steel (Bi-metal) with EPDM washer Reisser - a bimetal screw for thin sheets. The sheet metal screw is used for fastening profiles and sheets to steel and aluminum structures. Useful for installing photovoltaic structures. Advantages: Due to the innovative thread geometry, screws not only penetrate the sheet metal quickly, but also without spiraling, ensuring high load-bearing capacity of the connection. Combination of stainless steel A2 with a hardened drilling tip made of carbon steel - BI-Metal / A2 Specification: Screw 6x25 Sheet metal screw (Bi-metal) 6.0x25 Reisser RP-T2 Size: 6.0 x 25 Length: 25 mm Additional: EPDM washer 16mm Material: Stainless steel A2
