

Trapezoidal bridge Height=70mm L:330mm with EPDM

Product code: K.40x40.9

The trapezoidal bridge with EPDM gasket is designed for mounting photovoltaic panels on trapezoidal sheet metal. It features an aluminum rail and mounting profile measuring 70 mm x 300 mm. The EPDM gasket ensures a tight seal, protecting against moisture penetration. This bridge enables proper and stable installation of photovoltaic panels on roofs or other surfaces covered with trapezoidal sheet metal.
