Product description

The Huawei LUNA2000 wall mount is an advanced solution designed for wall mounting the LUNA2000 battery series. It provides stable and secure attachment, allowing for efficient use of space.

Key Features:

Ease of Installation: The LUNA2000 mount is designed with simplicity in mind, enabling quick and hassle-free placement of the battery on the wall.

Flexible Design: The modular design of the mount allows for scaling the energy storage system from 5 to 30 kWh, adapting to the user's individual needs.

The Huawei LUNA2000 wall mount is a reliable and flexible component of the energy storage system, ideal for use in smart homes and other locations requiring advanced energy management.
