Trina Vertex S+ TSM-NEG9R.28 445Wp is a high-efficiency photovoltaic panel with an efficiency reaching 22.3%. Thanks to the use of BFR and EVO2 technologies, the panel is characterized by resistance to harsh weather conditions and low power degradation in the first year (1%) and subsequent years (0.4%). The panel has 144 monocrystalline cells and is designed for compatibility with existing inverters and mounting systems. Its dimensions are 1762 x 1134 x 30 mm, and it weighs 21 kg. It offers a 25-year product warranty and a 30-year linear power degradation warranty.
