Jinko Solar JKM485N-60HL4-V - Performance and Reliability

Jinko Solar JKM485N-60HL4-V is a modern photovoltaic panel with a power output of 485 Wp, utilizing N-type cell technology and a half-cut design. With an efficiency of up to 22.47% and resistance to LID effects, this module ensures excellent performance and long-term reliability.

Main Advantages:

- **N-type cell technology** - higher efficiency and longer lifespan.
- **Half-cut design** - reduced energy losses.
- **PID resistance** - ensures long-term performance.
- **High mechanical durability** - resistance to wind (2400 Pa) and snow loads (5400 Pa).
- **Warranty:** 12 years on the product, 30 years on linear power degradation.
